

## Cosmetic Treatments

In addition to our excellent NHS service we also have a range of cosmetic treatments we can offer you.

- Crowns
- Veneers
- Bridges
- Tooth whitening
- Stain removal
- White fillings

If you are interested in any of our cosmetic treatments please contact us and arrange an appointment for a consultation.

“Helping you to a brighter smile”

## **Stain Removal - from £30**

Therapist appointments are available for cosmetic stain removal, teeth cleaning and oral hygiene advice. Please contact us for an appointment if you would like your teeth cleaning before a special occasion, holiday or a night out.

## **Tooth Whitening - from £250**

Tooth whitening is a conservative and cost effective way of lightening sound teeth without removing any tooth structure.

## **White Fillings - from £60**

Tooth coloured fillings can be used as an alternative to silver fillings. Tooth coloured fillings can be used to close spaces between teeth. Tooth coloured fillings can be used to improve the appearance of stained teeth.

## **Inlays - from £150**

Inlays are used to restore back teeth. They are laboratory made fillings that are cemented or bonded into a prepared tooth. They are an alternative to large fillings as they are more durable. They can be composite, porcelain or ceramic.

### **Veneers - from £300**

Veneers are thin layers of porcelain or ceramic which are made to fit over the front of teeth. They involve very little tooth preparation and can improve the colour, shape and position of teeth.

### **Crowns - from £300**

Crowns are laboratory made restorations that fit over a prepared tooth. They are the shape of a natural tooth. Cosmetically they conceal unsightly teeth and can improve the colour, shape and position of your teeth. Poorly fitting crowns can be replaced to improve aesthetics.

### **Bridges - from £300 per tooth**

Bridges can be used to replace 1 or 2 missing teeth. They are laboratory made restorations that fit over prepared teeth next to the gap. They are an alternative to partial dentures or implants.
